

PROJECT LIMITATIONS

Academic & Technical Constraints Identified During Semester 1 Development

01 • ACADEMIC • S1 PERSPECTIVE

Unfamiliarity with Amrita Question Papers

- Being Semester 1 (S1) students, we do not yet have a complete idea of official Amrita exam question paper patterns.
- Lack of prior experience with mid-term and end-semester question weightages across different subjects.

02 • CURRICULUM ALIGNMENT

Uncertainty in Coursework Reference Materials

- We do not yet know the exact supplementary references or lecture materials followed by every faculty member at Amrita.
- Some textbooks and external links are standard engineering references rather than classroom-specific notes.

03 • CONTENT DEPTH

Need for Material Fine-Tuning & Less Redundancy

- Current unit summaries and study resources are general and need fine-tuning to remove overlapping or redundant topics.
- Requires a more detailed, step-by-step learning approach tailored to Amrita coursework.

04 • TECHNICAL CONSTRAINT

Browser-Based Local Storage Quota (5 MB)

- Files uploaded or exchanged in the Admin section are saved in browser localStorage (capped at 5 MB per device).
- Uploaded files stay on the local browser until a shared cloud database is integrated in future updates.

KEY TAKEAWAY: As we progress beyond S1 and gain deeper familiarity with Amrita exams and coursework, these limitations directly guide our future improvements.
